## BRICK SOFA

# BRICK SOFA

Brick sofa is made up of three modules: a pouf-, a space- and a corner module, which can be put together in a myriad of variations via included clip-on holders. You can therefore create exactly the sofa you want - small or large with or without a corner.

The sofa is designed so that it has the same round shapes and voluminous expression as the other furniture in TRIMM Copenhagen's range. It is therefore also the cushions and pillows themselves that are the central element in the sofa. In addition, the sofa is created with an external metal frame that helps to give the sofa a lightness and a more mature expression.

The sofa should be seen as an extension of TRIMM Copenhagen's lounge universe, which with its very own design language invites to informal gatherings between people.

# ASSEMBLY INSTRUCTIONS

Brick Corner Module

Brick Space Module

Brick Pouf Module

Space- or Corner Module: Place the arms on the backrest in the holes of the seat construction. Make sure the backrest turns the right way.

Space- or Corner Module: Fasten backrest and seat with the included screws

Place the floor protecting plugs on the bottom of all legs.

Place the seat cushion on the frame and wrap the velcro straps around the frame pipe to secure the cushion.

Module attachment: If you have more than one module, they can be attached with the included clip-on holders.

Module attachment: Place the two modules close together and put the clip each module where you find suitable.
